

POWER BUS WAY ACCESSORIES

SAFE. RELIABLE. EFFICIENT.

Power Bus Way custom builds an array of electrical distribution accessories in our **ISO 9001:2015** fabrication facility.

With our extensive experience and knowledge in design, we manufacture innovative electrical products. We will handle any site-specific challenges to develop the right solution within budget.

Structural supports, mobile generators/load bank quick connect panels, NEMA rated electrical enclosures, bus bar adaptors, and more!

SUPPORT STRUCTURES

Power Bus Way designs and fabricates custom support structures for electrical distribution systems. The structures are engineered to meet all local standards and codes.

Disclaimer: Not actual colour. Green colour is used to highlight the supports

GROUND, WALL, CEILING, AND CUSTOM SUPPORTS

BUS BAR FABRICATION

Whether it is creating a tap off point, converting from cable to bus duct or extending bushings from a transformer, Power Bus Way can custom design buswork to fit all requirements.

CUSTOM ELECTRICAL ENCLOSURES

Extensive experience in fabricating electrical enclosures for both **low** and **medium** voltage applications.

NEMA Certified Enclosures Available In:

- Aluminum
- Steel
- Stainless Steel
