

POWER BUS WAY LTD.

BATTERY STORAGE

Cable Bus System

Power Bus Way Ltd. cable management system is designed specifically to integrate the tie between distribution transformers and **Battery Energy Storage Systems (BESS)**.

Robust enclosure construction and integrated cable support blocks have been designed to create a **short circuit rated system**.

It is custom designed and engineered to meet specification requirements on every project. Engineered system layouts predetermine routing to **reduce setup and installation time**.

Key System Benefits

- Fully engineered 3D design for accuracy specific to each site
- 6061-T6 Aluminum enclosure with stainless steel hardware
- Various bend fittings not limited by angle
- BESS expansion flange to accommodate ROXTEC gland plate (where required)
- All required cable for the designated ampacity (various sizes/types)
- All required lugs at each connection point
- Site support (Optional)

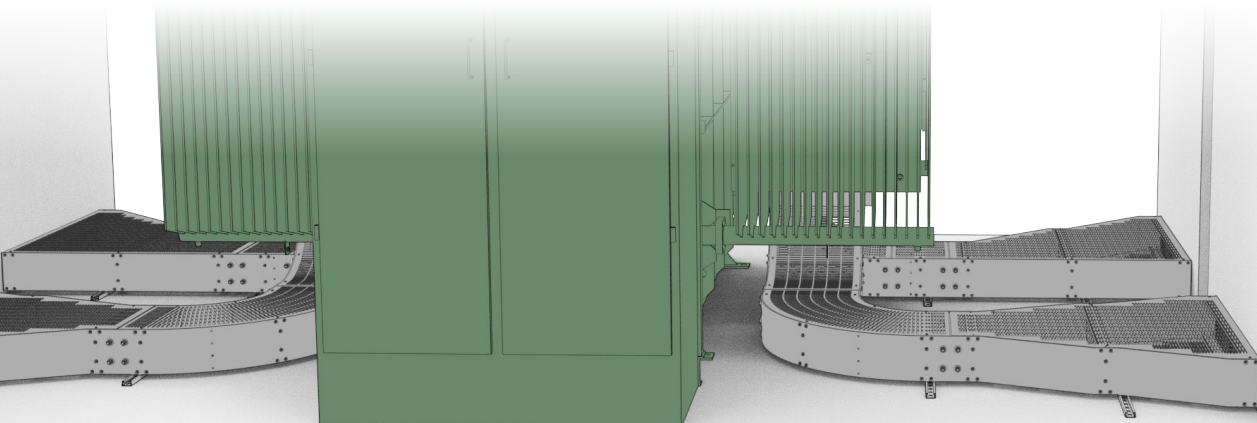

**18 Month
Product Warranty**

**IP-66 Connection
Flanges for XFMR**

**Short Circuit Rated
Cable Bus Enclosure**
