

## POLE-MOUNTED CABLE BUS

Explore the versatility of Power Bus Way's cable bus systems, tailored to meet your diverse needs. Our cable bus system can be used in **vertical pole-mounted applications**, effortlessly connecting with your existing infrastructure.

Our design facilitates the **system routing** of MV cable distribution from pole top connections to the supply-side entry. Power Bus Way cable bus systems offer remarkable **flexibility**, easily transitioning from pole top connections to underground trench systems, providing a **future-ready solution** that can meet all of your evolving needs.

Our **engineered** system layouts predetermine routing which minimize setup and installation time to ensure a **hassle-free** process from start to finish.

18-Month  
Warranty

Optional  
Site Support

### Key System Benefits

- Fully engineered 3D design for accuracy specific to each site
- Support requirements included for pole structure
- All required cable connectors and term kits included in scope of supply
- All required cable for the required voltage and ampacity (various sizes/types)

Maintain short circuit  
rating all throughout
